# Embed YouTube

1. Preview and select a YouTube video.

2. Notice the word *About* under the video. This tells when the video was uploaded and other facts about the video.

3. Underneath the video select *Share*.

4. New options will pop up. Select *Embed*.

5. Select the <iframe> code. You can select the size of the video and uncheck *show selected videos*.

6. I like to put my Weebly elements in columns. Open your Weebly editing page.

# Embed YouTube

7. Drag the *Multiple Columns* icon onto your workspace. (Only if you want multiple columns.) You will be able to select between 1 and 5 columns. You can drag another *Multiple Columns* into the first *Multiple Columns* if you wish to have more columns or use it as spacing.
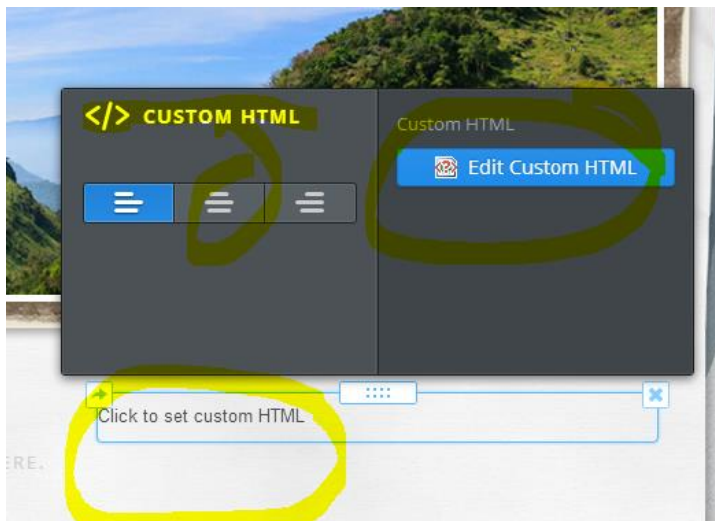

8. Drag the *Embed Code* icon over.

9. When you drag the *Embed Code* a new window will pop up. This is where you will paste the <iframe> code that you took from YouTube.

10. Click somewhere in the workspace and your video will show up.
